

# Assignments

Welcome to the "Assignments" section of our educational platform. Here, you'll find a variety of assignments designed to reinforce your learning, challenge your understanding, and help you apply what you've learned in a practical context. Assignments are a crucial part of the learning process, as they allow you to put theory into practice and develop critical skills. We encourage you to explore the assignments available and engage in active learning.

## Table of Contents:

### 1. Assignment 1: Research Project

- 🚦 Description: Conduct independent research on a topic related to your course.
- 🚦 Deadline: [Insert Deadline]
- 🚦 Submission Guidelines: [Provide specific submission instructions, e.g., file format, word count, citation style]
- 🚦 Grading Criteria: [Explain how the assignment will be graded]
- 🚦 Additional Resources: [Include links to resources that can help with research]

In Assignment 1, you will have the opportunity to conduct independent research on a topic relevant to your course. The purpose of this assignment is to deepen your understanding of the subject matter and enhance your research and analytical skills. Be sure to review the assignment description, deadline, submission guidelines, and grading criteria to ensure your work meets the necessary standards.

### 2. Assignment 2: Problem Solving

- 🚦 Description: Solve a real-world problem or case study related to your course.
- 🚦 Deadline: [Insert Deadline]
- 🚦 Submission Guidelines: [Provide specific submission instructions, e.g., format, presentation, or documentation requirements]
